**CHEMONT** has operated for over 50 years, previously as Zakład Budowy i Remontów Aparatury within organizational structures of CHEMICAL COMPANY "Oświęcim" (currently – SYNTHOS DWORY). Since 2005 CHEMONT exists as an independent entity. Nowadays the company employs 90 people.

CHEMONT specializes in the scope of apparatuses' production, industrial devices as well as repair-assembly jobs, especially:

- pressure, non-pressure and storage tanks
- heat exchangers and reactors
- coil pipes, mixers, filters and transmitters
- technological and industrial pipelines
- assembly of pipelines as well as machines and industrial devices.

Apparatuses mentioned above are made of unalloyed steel, boiler steel, rustless steel, duplex and hastelloy.

The company is well equipped with:

- own welding centre – welding works are performed in the scope of the methods: MIG/MAG, coated electrode and hidden arc welding
- relief annealing furnace : heating chamber 4x4x8 m; max temp. 720°C
- POLISUDE apparatus for automatic welding of tubes in exchangers' perforated bottoms
- machining machines:
  - side-head boring mill ( with the treatment possibility of overall dimensions max Ø 2800mm)
  - boring machine
  - pillar drill ( with the treatment possibility of overall dimensions max 3600 mm)
  - rolling machines: pipes (Ø<sub>max</sub> 108mm) plates (≠25mm, s= 2500mm) and profiles (h<sub>max</sub>=120 mm)

CHEMONT possesses the following authorizations and certificates:

1. Certificate confirmed by TUV Rheinland InterCert – Quality Management System according to PN-EN ISO 9001:2008
2. Certificates confirmed by Office of Technical Inspection:
  - **Manufacturing UC-02-32-W/1-05**
  - **Repair UC-02-32-N/1-05**
  - **Modernization UC-02-32-P/1-05**
    - Pressure tanks
    - Low-pressure tanks
    - Non-pressure tanks
    - Elements of pressure and non-pressure devices.

## **REALISED PROJECTS**
